Action on Postpartum Psychosis

About this course

Severe Mental Illness (SMI) and Postpartum Psychosis (PP) account for a large proportion of maternal deaths.

This one-day training course on the identification and management of PP and SMI in the perinatal period is suitable for all health and social care professionals working with mothers, infants, and families.

The course is delivered by world-leading Clinical/Academic experts alongside APP's Experts by Experience.

The course utilizes clinical experience, cutting-edge research, and the real experiences of affected women and families, to develop knowledge, confidence, and empathetic understanding.

Learning objectives address domains in the Competency Framework for Perinatal Mental Health Professionals, focusing on the risk areas of SMI and Postpartum Psychosis.

To book an APP Expert by Experience and Clinical / Academic Expert for your training event, please contact us.

A one-day course for up to 24 delegates is £3,120 (£130 per delegate) and includes training resources, a set of PP Insider Guides for each delegate, and travel to your site.
