

Take part in a research study

How does postnatal psychosis affect partners' relationships with mother and baby?

Why?

To gain an understanding of how postnatal psychosis affects partners and relationships.

Who?

- Partners who were in a relationship with a mother at the time of them experiencing psychosis following childbirth within the last 10 years.
- Fluent in English language and over the age of 18.

What?

Take part in a face to face or telephone interview with the researcher.

How?

If you are interested in taking part and would like more information, please email the researcher, Rachel Jack, on T7127956@live.tees.ac.uk
